DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art of record taken as a whole neither teaches nor renders obvious the claimed combination wherein comprising wherein the electric motor is mounted on the first drive assembly in such a way that the electric motor is guided above the running surfaces in an accordingly dimensioned space within the guide rail with the axis of the motor shaft being aligned between the supporting rollers at right angles to a plane that is defined by the running surfaces, the motor shaft is firmly coupled via a transmission to the drive shaft that is aligned in parallel to the axis of the motor shaft, the separating element is connected to the driving apparatus by means of an attachment element, that is held by a body of the first drive assembly and in parallel to the separating element, and a busbar extending in the longitudinal direction of the guide rail is arranged within the guide rail and is tapped by current collectors that are arranged on the fir-s-first drive assembly.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
